

München, Unterföhring

The **CPM, Compact Power Motion GmbH**, is part of the Swiss **SONCEBOZ GROUP**, with an annual turnover of € 300 million.

The **CPM GmbH** develops E-Drive in a small creative team. Our core competence is software and hardware development, as well as mechanical design and simulation. We develop prototypes and functional studies for innovative OEM's concepts. Our development office is located in the heart of the Bavarian automotive industry

For our international development team in Munich, we are looking for a full time

Workshop Prototypist (m/f)

Realize the future of electromobility with us. Develop new solutions for electrification within the automotive and truck sector.

At the moment we are improving the vertical range of our prototype construction. We would be pleased to welcome you as a skilled technician in mechatronics in our team.

Tasks:

- Production and construction of prototypes
- Close cooperation with the developers and designers
- Take "Make or Buy" decisions / supplier networking
- Validation of technical drawings
- Manufacturing of equipment and prototypes
- Preparation of test and quality reports
- Assemble electronic components

Profile:

- Completed vocational training as a mechatronician or precision mechanic or similar.
- Professional training as a master craftsman, technician or a BA advantageous
- Careful working with a high degree of quality awareness
- Responsibility for the entire workshop including products
- Experienced knowledge in milling and drilling (Schaublin 102)
- Knowledge in production processes and materials science
- CAD knowledge (SolidWorks) advantageous
- Languages: German or English fluently

What we offer:

- Interesting and challenging tasks in the automotive industry
- Working in a self-responsible manner
- Fully equipped workshop
- Good payment with flexible working hours, holidays and bonus system
- Harmonious, friendly team
- Excellent location: Munich, "The cosmopolitan city with heart"
